

COVID-19 COVERAGE AFTER MAY 11, 2023

On May 11, the federal government will end the official COVID-19 Public Health Emergency. Below are some important updates you'll need to be aware of on how your COVID-19 tests and vaccines will be covered on and after May 12, 2023:

- All lab/office COVID-19 tests will be covered the same way routine lab testing is covered
- At-home COVID-19 tests will not be covered
- COVID-19 vaccinations will be covered 100% when administered by an in-network provider
 - If you choose to use an out-of-network provider for this vaccine, the out-of-network benefits will apply

If you have questions about your lab testing benefit, visit www.bcbstupdates.com. More information can be found within your plan documents.
